

CIF SEMINAR on Thursday April 19, 2012 - Room B301 in Epalinges

Contributed by Florence MORGENTHALER
Wednesday, 04 April 2012
Last Updated Wednesday, 04 April 2012

The seminar by Dr. Jeroen Hostens will cover some of the applications of X-Ray Computed Tomography (CT) for rodents. This type of technology, available at CIF Epalinges, enables high resolution three-dimensional visualization and characterization of a wide range of specimens ranging from bone to soft tissue, while keeping the animals under anaesthesia.

For more information on the seminar or on the CT-Scan equipment at CIF, please contact Florence Morgenthaler, CIF Epalinges Technical Manager (florence.morgenthaler@unil.ch; phone: 021-692-58-91).
