As you can see we have decided to renew the CIF's website.

More than just a facelift, this new website has been designed to be more secure, more convenient to use, has more features...

Actually, the real improvement is for us as it is now very easy to add features such as surveys, polls, discussion boards.... an a lot easier to maintain.

For you, dear CIF users, the main change will be the way you authenticate: once you are logged in (using the small login box at the top of the menu), you have access to all the restricted parts of the website including reservation, file servers and so on. It is also possible to make the website remember your login and password, a convenient way to have a quick access to the restricted parts.

Enjoy !

The CIF Team.
