Some of the Mac users may have experienced some issues with the reservation system and the file transfer system using the Safari browser on their mac.

The bug is now fixed, and the website is compliant with Safari. If there are still some bugs, please do not hesitate to contact the webmaster (Yannick KREMPP) .

However, we still strongly encourage Mac users (and all others) to use Firefox as their primary web browser: like Internet Explorer, Safari is not 100% compatible with web standards...
