Thursday, 10 December 2009

ZEN 2009 (Zeiss Enhanced Navigation) is the new software replacing the aging LSM Image Viewer.

ZEN 2009 will also be the software driving the upcoming LSM 710 at the Bugnon, and already drives (as an option) the LSM 510 in Epalinges and the 2 Photon LSM 710 NLO at Dorigny.

Browse and edit your lsm confocal images, and familiarize yourself with the new interface.

Head up [here](#) to download it for your PC.
